KSIS Contact

FYI - The email below was sent to district PGES contacts from the Office of Next Generation Learners yesterday.

Good afternoon POCs,

Please see the announcement below regarding Median Student Growth Percentiles (MSGP). Note: the MSGP QRC link has been corrected.

Median Student Growth Percentiles (MSGP) are available **now** for review in Infinite Campus.

MSGP are scheduled for display in EDS to teachers mid-November.

Please distribute this information to those interested in accurately reporting MSGP. For example, principals will be interested in previewing the data in IC as it pertains to those 4th-8th grade teachers of math and reading receiving a summative rating this year as part of the Professional Growth and Effectiveness System (PGES). There are reports in IC available to help with this review and directions follow for reviewing teacher rosters. Infinite Campus finalizes this data on November 6th.

Median Student Growth Percentile Summary Report – For any teacher assigned to a Math or ELA course code, the summary report will display the following:

3-year Combined MSGP – The three year combined MSGP will include attributed student growth scores for the previous three school years.

Single Year MSGP – The single year MSGP will include attributed student growth scores for a single year.

Median Student Growth Percentile Summary Report QRC

Infinite Campus click path: KY State Reporting > KDE Reports > Median Student Growth – Summary
        NOTE: Users must be granted access by local KSIS administrator before they will see this report.

The report Section Roster displays students in each section for a teacher or course chosen.

Infinite Campus click path: Scheduling > Reports > Section Rosters
        NOTE: Users must be granted access by local KSIS administrator before they will see this report.
